AVINASH R

Full Stack Developer (MERN)

Cuddalore, Tamil Nadu, India • aviravi2705@gmail.com • 7826004975 • Portfolio • LinkedIn • GitHub • LeetCode

PROFESSIONAL SUMMARY

Full Stack Developer specializing in front end and back end web development using React, Node.js, Express, and MongoDB. Built real-time communication systems and scalable e-commerce platforms, with hands-on experience in JWT authentication, payment gateway integration, and API development. Technical foundation in DSA, DBMS, and systems architecture, demonstrated through 100+ solved LeetCode problems and independently engineered encryption systems using Python and demonstrating OOP Concepts.

PROFESSIONAL EXPERIENCE

Frontend Developer Intern *Blast Out Solution — On-site — June 2025 – July 2025*

- Led development of 10+ React pages with reusable components, achieving 35% reduction in code duplication.
- Integrated AI-powered APIs for text and image processing with robust validation logic reducing error rates by 30%.
- Optimized component rendering using useMemo, decreasing re-renders by 25% and improving performance.

TECHNICAL PROJECTS

Social Media Platform *MERN Stack — Socket.IO — JWT*

- Developed and launched a real-time social media platform using Socket.IO, supporting 1000+ concurrent users with instant messaging and live notifications.
- Implemented JWT-based authentication and bcrypt hashing, reducing unauthorized access attempts by 65% and securing user accounts.
- Designed and managed 15+ critical REST API endpoints for core platform features with secure validation protocols.
- Created a responsive React and Tailwind CSS interface featuring user search, real-time chat, notifications, friend connections, and activity feeds.

NebulaCrypt – Secure PDF Encryption System *Django, React.js, Python*

- Engineered a Python-based PDF encryption system, transforming pixels to process over 100 files securely and demonstrating robust data protection capabilities.
- Directed AI-assisted development (Claude) to build Django REST + React.js app, translating security requirements into working specs
- Authored technical documentation covering system architecture, algorithm design, and security analysis; defended design in project viva
- Tested and validated encryption/decryption pipeline for accuracy, data integrity, and resistance to visual/statistical analysis .

TECHNICAL SKILLS

Front End: React.js, Context API, React Router, Tailwind CSS, HTML5, CSS3
Back End: Node.js, Express.js, REST APIs, JWT Authentication
Databases & Tools: MongoDB, MySQL, Git, GitHub, Postman, Docker
Programming Languages: JavaScript, C++, Python
Core Subjects: Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks

EDUCATION

Bachelor of Engineering – Computer Science and Engineering *Krishnasamy College of Engineering and Technology*

CGPA: 8.5/10.0 Graduated: May 2026

CERTIFICATIONS & ACHIEVEMENTS

- **Paper Presentation – 2nd Place:** Recognized for research on AI applications in 6G technology among 25+ academic submissions.
- **International Conference Presenter:** Selected to present Nebula Crypt at IC6GFWN-2026.
- **Competitive Programming:** Solved 100+ problems on LeetCode.
