AVINASH R

Software Developer

Chennai, Tamil Nadu, India • aviravi2705@gmail.com • 7826004975 • Portfolio • LinkedIn • GitHub • LeetCode

PROFESSIONAL SUMMARY

Software Developer specializing in front end and back end web development using React, Node.js, Express, and MongoDB. Shipped a production AI-powered SaaS platform and an AI-driven recruiting platform, with hands-on experience in RBAC system design, JWT authentication, payment gateway integration, and API security. Strong foundation in DSA, DBMS, and systems architecture, demonstrated through 90+ solved LeetCode problems and independently engineered encryption systems using Python.

PROFESSIONAL EXPERIENCE

Software Developer Intern *Softtwig Technology Solutions — Chennai — On-site — August 2026 – Present*

Live Demo: https://softtwig.tail2b33df.ts.net/admadee/

- Delivered **AdMadee**, an AI-driven marketing SaaS platform enabling businesses to create image/video advertisements, manage leads and customers, and publish content from a unified dashboard.
- Architected **multi-tenant RBAC** workflows for Admin, Employee, and Customer roles, securing 20+ Express.js routes with **JWT, bcrypt, Helmet.js**, and middleware-based authorization.
- Integrated **3 LLM providers** (Gemini, DeepSeek, and Claude) for AI-assisted ad content generation, producing structured headlines, descriptions, CTAs, and video scripts in **under 10 seconds**.
- Integrated **4 third-party services** (Razorpay subscriptions, website lead capture, cron-based email scheduling, and Meta OAuth) for Facebook/Instagram publishing directly from the application.

TECHNICAL PROJECTS

NebulaCrypt – Secure Document Transmission System *Django REST Framework, React.js, Python*

- Engineered a secure document transmission system in Python using **pixel-level scrambling and XOR-based encryption**, converting PDF content into a protected image representation resistant to interception.
- Designed recipient-side **decryption and access control** with credential- and key-based authorization, ensuring only authorized recipients can recover the original document.
- Built a **Django REST + React.js** interface around the encryption pipeline, validating accuracy and data integrity across **100+ test files**.
- Presented the system's architecture and security design at **IC6GFWN-2026** and defended it in project viva.

Job Hunter – AI Recruiting Platform *Web Application, AI Integration*

- Created an AI-powered recruitment platform combining **4 core modules** (job discovery, personalized recommendations, resume management, and application workflows) within a unified platform.
- Implemented multi-criteria job discovery using **skills, posting date, and additional filters** across 20+ REST API routes, helping users identify relevant opportunities efficiently.
- Built an AI-assisted **auto-apply workflow** that selects the most relevant resume for a job application while also supporting manual resume uploads.
- Established job-specific **skill-gap analysis** to identify missing skills, recommend areas for improvement, and generate a **resume-to-job match score**.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, C++

Frontend: React.js, Redux Toolkit, Context API, React Router, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Middleware Design

Databases: MongoDB, MySQL

Developer Tools: Git, GitHub, Postman, Docker, Vercel, Razorpay

Core Computer Science: Programming Fundamentals, OOP Concepts, Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks, SDLC, AWS Basics (EC2, S3)

EDUCATION

Bachelor of Engineering – Computer Science and Engineering *Krishnasamy College of Engineering and Technology*

CGPA: 8.5/10.0 Graduated: May 2026

CERTIFICATIONS & ACHIEVEMENTS

- **Paper Presentation – 2nd Place:** Recognized for research on AI applications in 6G technology among 25+ academic submissions.
- **Competitive Programming:** Solved 90+ problems on LeetCode.
